# FPS 2014 Configuration Screen shots

Receiver Determination

After configuration, the configuration needs to look as follows:

The highlighted objects are the SAP delivered objects. The others are your customising objects, e.g. the name of your service, or the name of your communication channel.

Interface Determination

The highlighted objects are the SAP delivered standard. Please note that you may have to manually input the name of the Inbound Interface and the namespace. Once that is done, you should be able to select the Interface/Operations mapping

Interface	HR_GB_EFO_RTI_OUT
Namespace	http://sap.com/xi/HR

Receiver

Party	GovernmentGateway
Service	GGmailox_submission
Description	

Type of Interface Determination

◉ Standard ○ Enhanced

Quality of Service

☑ Maintain Order At Runtime

Configured Inbound Interfaces

	Inbound Interface		Interface Mapping		
	Name	Namespace	Name	Namespace	Software Component Version
1	HR_GB_EFO_FPS_IN_14	http://sap.com/xi/E-FILING_GB/2011	HR_GB_EFO_RTI_IM	http://sap.com/xi/E-FILING_GB/2011	E-FILING GB 1.0

Receiver Agreement

The Receiver agreement configuration should look like this. The highlighted objects being the ones delivered as SAP standard and the others being your configuration objects.

Receiver

Party	GovernmentGateway
Service	GGmailox_submission
